COURSEWORK

COURSERA
Artificial Intelligence Planning
Machine Learning

EDX
Software as a Service

SKILLS

PROGRAMMING
Over 5000 lines:
Ruby • Shell • JavaScript/Node.js
Over 1000 lines:
Common Lisp • Objective-C
Familiar:
Haskell • Clojure • Go • iOS • Android

EXPERIENCE

INNOHAT | Co-founder + Chief Engineer
Oct 2013 – Present | Hong Kong and Taipei
- Responsible for all developments of front-end (Angularjs, PhoneGap, Objective-C for iOS and Java for Android) and back-end (CouchDB, Ruby on Rails).
- Common Lisp was used inside the iOS App for fast development.
- Made technical interview for recruiting other developers into Innohat.
- We have received several seed funding and is now accepted into AppWorks, one of the biggest accelerator in Asia.

GITCAFE | Software Engineering Intern
June 2014 – Aug 2014 | Shanghai and Beijing
- Worked with the Chatterbox team and wrote the prototype for new version of Chatterbox.
- Responsible for the development of the back-end of ShortCool, a video-streaming tool.

LAUNCHPILOTS | Software Engineering Intern
Jan 2014 – June 2014 | Hong Kong
- Worked on the development of the Lanchupilots website using Ruby on Rails.
- All code was reviewed, perfected, and pushed to production.

NOTABLE PROJECTS

VLAJIPNO | Lojban Full-text Search Engine
Created a full-text search engine for an artificial language called Lojban. There's still active Lojban learners using this tool to study the language.

STORYCAFE | A Machine Learning News Reader
Storycafe is a simple news reader that sort feed by what you like. HackerNews feed and RRS feed is supported.

AWARDS

2014	Incubatee	AppWorks, Taiwan
2014	Dean's List	Faculty of Science, HKBU
2013	Incubatee	Cyberport, Hong Kong

TALKS

Sep 2014	Software Freedom Day	Lojban, A Case Study
Sep 2014	HKCodeConf	In the World of Flow-based Programming
Aug 2014	Open Innovation Lab	Lojban, An Artificial Language
May 2014	Codeaholics	Using LISP/Scheme in iOS Apps

ACTIVITIES

2014	Curator	TEDxHKBU and TEDxHKBULive
2014	Curator	IdeathonHK
